

Construction and Demolition Waste

Collection Regulations for Construction or Renovation

INSTRUCTIONS FOR DISPOSAL OF BUILDING MATERIALS

It is important that property owners comply with the Borough of Maywood's trash and refuse collection regulations when undertaking any renovation or structural alteration. Maywood's garbage and trash collection are an essential service program and it has been designed to benefit taxpayers in an efficient and equitable manner. It is structured to provide collection of the usual daily household garbage and trash materials that are generated by everyone. It is unfair to burden the taxpayer with costs for collection and disposal of materials generated by renovations or construction.

When contracting for dumpsters and/or private collection pick-ups, you must instruct the disposal company to collect the dumpster from Monday - Friday, between the hours of 7:00 am to 6:00 pm.

The following items **WILL NOT** be picked up by the Borough's contracted hauler at the curb with household garbage:

- Wooden pallets of any kind
- Paints/thinners
- Liquids
- Stone/rock/concrete/brick
- Dirt
- Oil
- Building/Construction materials (windows, doors, paneling, toilets, sinks, cabinets, tile, lumber, etc.)
