

MAYWOOD DEPARTMENT OF PUBLIC WORKS

Waste Paint Hardener turns liquid latex paint solid for curbside disposal. Simple to use: add crystals, mix with paint and dispose once paint hardens. One scoop hardens up to 2 - 3 gallons of latex paint and a 5 gallon pail will treat up to 100 gallons of paint.

Add crystals to excess latex based paint, stir until thick, let harden and dispose according to local regulations

Covers up to 2 - 3 gallons of paint per packet

Absorbs moisture in latex paint leaving paint hardened for disposal according to local regulations

Ready and quick to use: simply pour and stir

Paint hardens in minutes

Can be used for latex oil-based paint spills, where the absorption rate of hardener is reduced

Always read instructions completely prior to use
